Using The Phonics Kit Manipulatives

You and your teacher will be using your letter tile kit to practice reading words in English.

This kit has many different tiles. Some tiles are different colors and other tiles have different letters on them.

Letter tiles.... color tiles... Repeat after me. Letter tiles...color tiles...

You will use the color tiles to represent each sound that you hear in a word like this.

The word is hat.../h/ /a/ /t/

I hear three sounds in the word hat, so I will choose three color tiles and place them down.

While there are several different colors you can choose from, be sure to only use the red tiles for the vowel sounds you hear in the word.

For the word hat, I heard the sound. /a/ which is a short vowel sound, so I will use a red tile for that sound.

Now that you've placed down the color tiles for each sound you hear.

You are ready to choose the letters that make those sounds. The first sound is /h/, so I will choose the letter h because h makes the /h/ sound. The next sound is /a/, so I will choose the letter a because a makes the short a sound. The last sound is /t/ So, I will choose the letter t because t makes the /t/ sound. Now I am ready to read my word.

/h/ /a/ /t/...Hat

Remember, each color tile represents the sound you hear in the word, and each letter tile is matched to that sound. These tiles will help us as we practice combining our letters and our sounds to read New English words.
