Finger Stretching

Hello friends, in this video we will be learning about an activity known as **Finger Stretching**.

Finger means _____ (student's native language) and **stretching** means _____ ((student's native language)).

Finger stretching is an activity where we stretch out a finger for every sound that we hear in the word.

To begin, the teacher will say a word. You will then repeat the word.

As you repeat the word, you will make a fist with your hand.

After repeating the word, with your fist in the air, you will stretch out a finger for every sound that you hear in that word.

Once you have done that, you will return to making a fist as you say the complete word.

Let's look at an example of this activity.

The word is **hat ...hat**. /h/ /a/ /t/ ... **hat**

Let's practice one more time. Remember, first, the teacher will say the word. Then you will repeat the word as you make a fist. Next, you will stretch out a finger for each sound that you hear in that word.

Lastly, you will return to your closed fist as you say the completed word.

The word is **sat.... sat**. /s/ /a/ /t/ **sat**

Great job! Now you know how to participate in the activity known as **Finger Stretching**.
