Build a Word

You will be participating in an activity known as **Build a Word**.

Your teacher will first begin by saying a word.

You and your classmates will then repeat that word. As you repeat the word, you will make a fist with your hand and stretch out one finger for every sound that you hear in the word.

For each of these sounds, you will place a **color tile** on your board

You will then place a **letter tile** for every sound you hear below each **color tile**.

When you are done, you will use **touch and say**, you will touch each letter and make their sound as you combine them to read the word.

Once you have finished, you will hold up your board so that your teacher may check your work.

This activity is known as **Build a Word!**
