What are Heart Words?

Learn all about **heart words**.

Heart words are words we carry in our hearts. **Heart.....Words..... Heart Words...**
Say it with me **Heart Words...**

When you love someone or something very much, you carry them with you inside your **heart**. This way you never forget about them!

Heart words are words that we will also carry inside our **hearts** so that we can immediately recognize and relate to them. It's like when we carry someone like mom or Dad or grandma or grandpa inside our **hearts**.

When you see them, you immediately recognize them. You don't even have to think about who they are. You just know because they are special to your **heart**.

Heart words are words we will also carry within our **hearts**. Your teacher will introduce you to several words with certain parts for you to keep inside your **heart**.

When you are reading, you can remember these special parts, and it will help you recognize these special words.

As you continue to learn more about special **heart words**, you will also see several new ones. The newer ones may be harder to recognize right away because they're either longer or they may look a little different. When this happens, we can remember certain parts of the **heart words** that we already carry with us to help us read each new word.

Now we will be able to recognize and keep even more special words within our **hearts**.

Heart words are special because they help us read.
